- haidarahnaf137@gmail.com

Detail-oriented Data Analyst transitioning from an engineering background, with a strong grasp of data manipulation and statistical analysis. Skilled in using SQL to query databases, Python (Pandas) for data cleaning, and Google Cloud for data warehousing. Proven ability to transform raw data into clear reports and actionable business insights. Disciplined, logical thinker, and eager to support decision-making processes.

WORK EXPERIENCE

► Lead Data Analyst | Cryptocurrency Market Project

Dec 2025 - Jan 2026

- Automated real-time data extraction for Bitcoin & Ethereum via APIs using Python scripts.
- Cleaned and transformed raw JSON datasets using Pandas to ensure high data quality for reporting.
- Designed and managed structured data tables in Google BigQuery for SQL-based analysis.

► Senior Data Analyst | Think Unlimited

Jul 2025 – Aug 2025

- Analyzed operational data and KPIs, successfully improving system efficiency by 18%.
- Produced technical reports based on performance metrics to support strategic decision-making.
- Supervised a team of engineers, fostering technical growth and data-driven workflows.

SKILLS

Hard Skills

- Python & SQL Programming
- Data Cleaning & Transformation
- Google Cloud Platform (BigQuery)
- Automated Data Collection (ETL)

Technical Skills

- Root Cause Analysis & Problem Solving
- Project Management & Process Optimization
- Data Quality Assurance & Validation
- Business Intelligence & Strategic Planning

EDUCATION

Bachelor of Informatics Engineering

2024 – Present

University of Darussalam Gontor | Database Systems, Algorithms, Artificial Intelligence
